

Reza Ghalavand

Applied AI Engineer

LLM Systems | RAG | Agent Governance | Evaluation | Python

rzglvnd@gmail.com | Portfolio | GitHub | LinkedIn

Professional Summary

Applied AI Engineer building LLM applications, retrieval pipelines, and agent governance tools in Python. Combines hands-on AI project work with 15+ years in software engineering, enterprise backends, databases, and automation. Focused on testable interfaces, explicit control boundaries, and maintainable AI software.

Selected AI Engineering Projects

Local LLM Chat Engine

Built a modular FastAPI RAG backend with document ingestion, TF-IDF and optional embedding/FAISS retrieval, snapshot persistence for TF-IDF, and local or hosted model adapters. Includes API/CLI interfaces, tests, Docker, and operational documentation.

LangGraph Governance Lab

Implemented deterministic evaluation of submitted agent traces against tool, approval, model, step, and cost policies. FastAPI supports single/batch evaluation and optional LLM remediation advice. Runtime enforcement requires caller integration.

AI Systems Notes

Authored a versioned engineering handbook covering LLM architecture, RAG, evaluation, security, and operations, with a MkDocs build checked in CI. Reference patterns are documented; reproducible benchmarks remain in progress.

Technical Skills

Applied AI: LLMs, RAG, embeddings, FAISS, LangGraph, LangChain, prompt engineering, policy evaluation

Backend and delivery: Python, FastAPI, REST APIs, pytest, Docker, Git, GitHub Actions, Linux, Kubernetes

Engineering foundation: .NET, C#, C++, PHP, SQL Server, PostgreSQL, Redis, enterprise systems

Professional Experience

Senior IT Systems Engineer | Esfahan Regional Electric Company | 2025-Present

Support enterprise IT systems, backend infrastructure, automation initiatives, and mission-critical software operations.

Remote Technical Support, DBA & AI Automation Developer | Darya System | 2022-Present

Provide remote ERP support and SQL Server administration; build Python automation tools and improve reporting and operational workflows.

Senior Software Programmer | Yeganeh Computer Center | 2010-2025

Developed enterprise backend features, optimized SQL Server performance, modernized legacy code, documented systems, and automated business processes with Python.

Education

B.Sc. Software Engineering | Islamic Azad University of Najafabad | 2007-2012
