Email: rzglvnd@gmail.com

Professional Summary

Senior Software Engineer with 15+ years of experience delivering enterprise software, backend systems, ERP solutions, and SQL Server administration. Experienced in designing maintainable systems, modernizing legacy applications, and automating operational workflows. Currently focused on applying Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangGraph, and Python to build practical AI-powered software for enterprise environments.

Core Competencies

Languages: Python, C#, C++, PHP

Backend: .NET, FastAPI, REST APIs

Databases: SQL Server, PostgreSQL, Redis

AI: LLMs, RAG, LangGraph, LangChain, Prompt Engineering

Infrastructure: Docker, Git, Linux, Kubernetes

Domains: Enterprise Software, ERP, Database Administration

Professional Experience

Senior IT Systems Engineer — Esfahan Regional Electric Company (Current)

- Support enterprise IT systems, backend infrastructure, automation initiatives, and mission-critical software operations.

Senior Software Programmer — Yeganeh Computer Center (2010–2025)

- Developed enterprise backend features, optimized SQL Server performance, modernized legacy codebases, created technical documentation, and automated business processes using Python.

Remote Technical Support, DBA & AI Automation Developer — Darya System (Remote) (2022–Present)

- Provided ERP support, administered SQL Server environments, built Python automation tools, and improved reporting and operational workflows.

Selected Projects

- AI Systems Notes** — Open-source knowledge base for practical AI engineering.
- LangGraph Governance Lab** — Research repository exploring governance and orchestration patterns.
- Local LLM Chat Engine** — Production-oriented local LLM platform with modular architecture.

Education

B.Sc. Software Engineering — Islamic Azad University of Najafabad
